How to set up contour cut sticker sheets

1) Send two vector PDF files at exactly 12 x 24 inches:
   A) the PRINT file with your sticker designs (page 2 of this template)
   B) the CUT file with only the vector cut lines (page 3 of this template)
2) Both files keep the four 0.25" black registration dots, 0.1" from each corner. Do not move them.
3) Keep every sticker inside the orange dashed line (0.5" from the sheet edge).
4) Give each design 0.1" of bleed past its cut line, and keep stickers at least 0.25" apart.
5) Smallest sticker: 1.25". Delete these instructions, then save each page as its own PDF.

Not sure? Choose "Yes, please set up my sticker sheets" on the product page and we arrange them for you.

Examples of standard shapes (no smaller than 1.25 in)

circle square triangle rounded rectangle

Gray = your design area (with bleed)

Pink line = where the sticker is cut

Sheet is exactly 12 x 24 inches

PRINT FILE: place your sticker designs here (keep the 4 black dots)

CUT FILE: vector cut lines only, same positions (keep the 4 black dots)
